

QUALITY POLICY

It is the responsibility of all employees to familiarize themselves with the contents of this quality manual and to comply with the policies and procedures laid down in this manual and associated documentation at all times.

Foynes Engineering is engaged in the fabrication and installation of Pressure Vessels and Piping systems in accordance with International Standards for the Food, Process, and Petrochemical industries. It is Foynes Engineering policy to always achieve customer satisfaction by consistently conforming to agreed requirements. To achieve this, the expectations, needs, and requirements of our customers and other interested parties are identified and satisfied, or exceeded where possible.

Our objective is to successfully expand our business and become recognized as a market leader in our field. As a tool toward achieving this objective, we have established a quality system based on the International Standard ISO 9000:2008.

The quality system provides assurance that the necessary controls are consistently and adequately applied to meet the expectations and needs.

We are committed maintaining and continually improving our quality system.

All employees are committed maintaining and improving on our existing quality standards and we have allocated sufficient resources to ensure that quality remains at the heart of our business.

We welcome comment and suggestions that may assist in our pursuit of quality

Brendan O Connor,
Managing Director.
